

ODI HOUSTON

SALES, SERVICE AND TEST CENTER

After-Market & Technical Support
Conveniently located in North Houston
8,500 Sq.Ft. (790 Sq.M.) Facility

ODI Houston Sales, Service and Test Center is 8,500 square foot facility, located on Greens Parkway. The Center provides a full range of services including harness assembly, sensor integration, hyperbaric testing and project engineering support. The center supports a fully trained field service team for worldwide installation and maintenance of ODI's product range. The facility is ISO 9001 compliant and is an integral part of ODI's global business, being fully networked to the company's comprehensive information systems and thus having immediate access to all relevant engineering, manufacturing and maintenance data. The center provides a focus for client and engineering activities including meetings which can be held in the facility's conference area.

Product Support

Providing local support of ODI products:

- Holding stock of various key components
- Integration of third party equipment
- Manufacture and testing of final assemblies, including complete tree sensor harnesses
- Offering local client witnessing

Technical Support

- On call for immediate support for installation, repairs and service issues
- Fully equipped for on-site assembly and repair of ODI products
- 24-hour coverage for emergencies

ODI Houston

Sales, Service and Test Center

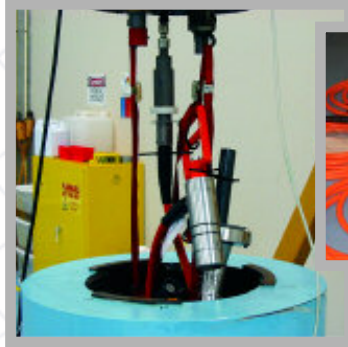

Test Facility

The Center provides a fully equipped, computer-controlled hyperbaric test facility to support pressure testing for products, integrated sub assemblies and repair items. A large pressure vessel (10,000PSI rating, 20" I.D.) is available for connector and harness testing (harnesses up to 800ft. in length can be accommodated). This test and service facility is available for lease for all types of hyperbaric testing on a daily basis.
